

DVK-SFEU-API-1-GEVK: Sigfox API Development Kit

Evaluation/Development Tool Description

The Sigfox API DVK (DVK-SFEU-API-1-GEVK) is a miniaturized development kit for the designer starting out with the AX-SIGFOX-API chip, a ultra-low power high performance Sigfox™ SoC for up-link and down-link. The Sigfox API DVK hardware consists of a USB debug adapter and an RF module. The AX-SIGFOX library (AX-SF-LIB-1-GEVK) is required to develop software for the Sigfox API DVK. The module has a tiny footprint of just 33 x 15 mm², and is equipped with an SMA connector.
